

Frozen H1-H3 evidence: repeatability, targeted geometry and explanatory limits

A H1: reserve sampling repeatability

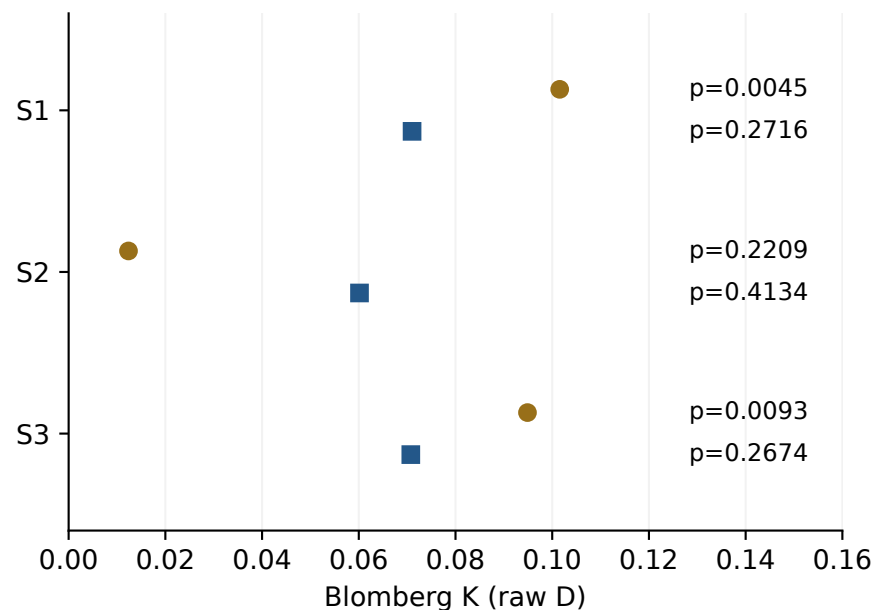

B H2: targeted white-axis alignment

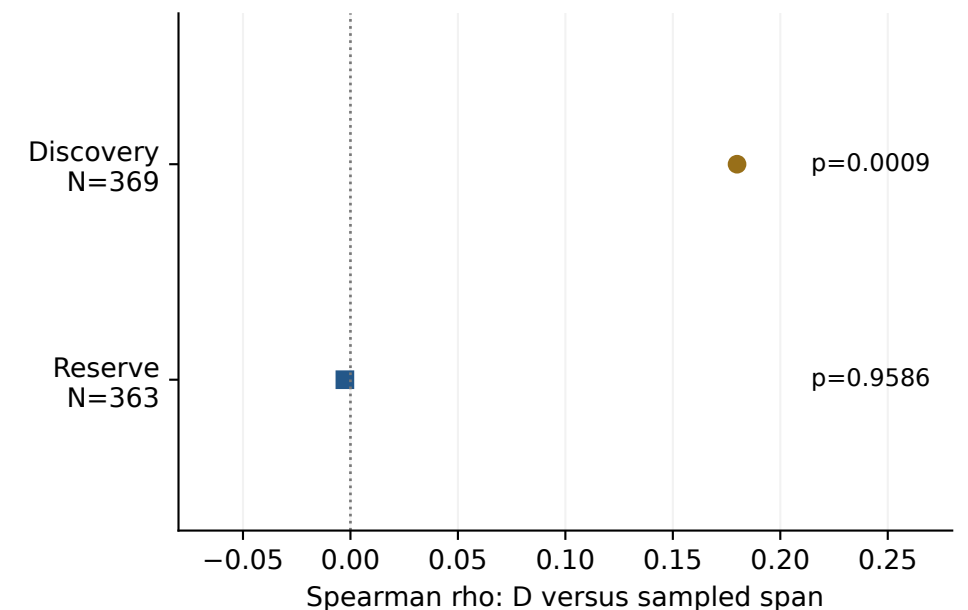

Circle: observed. Grey: null median and 2.5-97.5% range.
Null range is NOT an observed-effect confidence interval.

C H3a: raw phylogenetic signal

Circle: discovery, 368 tips. Square: reserve, 341 tips.
Scenarios are not confidence bounds; no CI is supplied.

D H3b: sampled photographic span

No CI is supplied by the retained summary.
Sampled span is not verified biological range size.
